caringcompany 2007/08

Awarded by The Hong Kong Council of Social Service
香港社會服務聯會頒發

NetMon Information Systems Limited

announced that it has won the "Caring Company" logo for 2007-08 from the Hong Kong Council of Social Service (HKCSS). The "Caring Company" scheme aims to encourage good corporate citizenship, staff morale and enhance company image among Hong Kong companies, so as to foster a harmonious community. By facilitating partnerships between the business and social welfare sectors, the scheme seeks to cultivate a caring spirit within the community. The "Caring Company" award endorses NetMon's wholehearted dedication to fulfilling its duty as a corporate citizen in Hong Kong.

NetMon's enthusiasm is not confined to our channel partners' and customers' well-being, but reaches out to the community by organizing and participating in different volunteer activities. We share our business expertise in the latest network security trend and preventive controls with NGOs, schools, public, our channel partners and customers via different local and international security conferences. We also work on pro-bono network security consultancy project to enhance the operation of the NGOs. NetMon aspires to fulfill its social responsibility by contributing to the very society from which it receives. For instance, the company often sent our staffs to educate public, SMEs, parents & students how to prevent internet crimes and introduce some parental security tools via public & private seminars organized by the Society of Rehabilitation and Crime Prevention, HKCERT, OGCIO, Jockey Club Teen Guard Valley and HKPC, etc. The company also encouraged its staffs to involve in different elderly visits in conveying soup giving activities organized by St. James Settlement.

Besides running a business, social responsibilities are just of equal importance to our company. By driving participation in community services, companies not only can help cultivate a sense of belonging among the staff, but also enable them to lead a more fruitful life. In other words, the public are being motivated to contribute love and care to the society, while our vendors, channels partners and customers can benefit with enhanced company brand image for its future development, creating a win-win situation to all parties.

NetMon was awarded 'The Linux & OSS Best Solution Award 2008' for two consecutive years

NetMon has received "Winner of Security Solutions & Services Provider" granted by Linux Pilot's Editorial. The award presentation will be held on 17 April 2008 (Thur) during the "Embedded Software Forum", which is organized by HK Linux Industry Association & HK Trade Development Council.

On the competitive advantage, the jury commented that NetMon deeply understands security market newest demand to enrich the open source infrastructure & application system security. On business interests, NetMon was highly commented to have the expert security consultancy service and take the lead to provide the Managed Security Services to different size of businesses.

NETMON WAS INVITED TO BE ONE OF THE IBM ISVs IN SMB COMBO PROGRAM

IBM SMB Combo's open architecture supports traditional PSTN connections and IP telephony protocols and standards, allowing ISVs to easily integrate telephony into their business and collaboration applications through standard protocols and new application programming interfaces. IBM is currently working with NetMon to offer a wide range of optional infrastructure applications for Hong Kong SMBs that span security management System on Unified Messaging Solution for Lotus Domino.

POLYNET IT SECURITY SYMPOSIUM 2008

Date: 4 - 5 June, 2008 (Wed & Thu)
Venue: The Hong Kong Polytechnic University Jockey Club Auditorium

POLYNET IT Security Symposium 2008 is the joint force symposium focusing on the promotion of latest information and network security concerns to enterprises, government, education sectors and general public in Hong Kong. Co-organized by NetMon Information Systems Ltd., The HK Polytechnic University and Linux Pilot, it will thoroughly unveil the newest proliferating network threats by deploying the latest innovative security technologies to resist the Polyhedral Network attacks which enhance the level of Enterprise Information Security in different platforms. This 2-day event will be the most promising occasion for the leading security vendors to capture the potentials which will surpass over 500 CSOs, CIOs, Information Security Experts, IT Manager and Academic IT delegates, etc.

This year, the Symposium will go beyond the technology and product features to demonstrate how the existing applications and solutions provide value to optimize your business growth. With the support of major IT/security enterprises and organizations in town to introduce cases and share solutions to hindrances they currently facing as backbone of the Symposium, attendees would gain insights from practical experience sharing and persuasive examples. To introduce the new security threats and come with the advancement technologies during the conference, it must also pay a high attention on the information security measure with solutions of such an open large-in-scales Wifi network in Hong Kong. Featuring in-depth presentation from the keynote, seminars and insightful enterprise case studies by industry leaders, heavy weighted speakers from the top IT security suppliers with the academic and government security professionals, this Symposium provides an interactive platform to share on the hottest information security technology issues that affect our daily business operations.
